

SureStrike™

LASER AMMO
TRAINING TECHNOLOGIES

Laser Training Cartridge

Use the patented SureStrike™ Laser Cartridge to train with your own firearm at any location without using live ammo.

The SureStrike™ laser cartridge is easily inserted into the chamber, and will emit an eye-safe laser pulse, a "shot" of laser light, every time the trigger is pulled!

The SureStrike™ acts to prevent the accidental loading of a live round, with no need to take apart your firearm. Benefit from the full range of dry-fire drills while getting immediate feedback on your performance.

- 9 mm cartridge - Adapters available to fit:
40s&w, 45ACP, 45LC, 36SPC, assorted shotgun & rifle calibers
 - 380 Cartridge - No adapters available
 - Makarov Cartridge
 - Laser Cartridge for Glock 17R & 19R (Vibration activated)
including UhrSecure™ safety system
 - Other
- Red
 IR

Includes: SureStrike™ Laser Cartridge, User Guide, 3 Reflective Targets (targets not included with IR cartridge) and battery pack.

We make shooters better! Spend less effort, time, and money by practicing with today's best personal training system anytime, anywhere!

User Guide

Step 1 – Safety:

Unload the weapon.

Physically and visually inspect the chamber, bore, and magazine well to ensure that all ammunition has been removed.

Unload ammunition from any magazines that will be used in training.

Store ammunition in an area that is separate from your training area.

⚠ Always personally verify that all ammunition has been removed before training.

Do not allow any live ammunition in the training area.

Step 2: Battery Installation

Unscrew the laser cartridge and insert the battery pack according to the drawing (plus side facing up). Reassemble the laser cartridge carefully. Verify the threading is fully closed and that there is no gap.

Step 3: Laser Installation in Pistol

Retract the slide and engage the slide stop in the open position. Make sure the slide is held firmly by the stop.

⚠ Do not continue if the slide is not held firmly or the slide stop is not in good working order.

While pointing the barrel down, insert the laser cartridge into the handgun by "dropping" it, laser first, through the slide opening into the chamber.

Still pointing down, release the slide stop. Point the weapon at a safe backstop and pull the trigger to verify that the unit is properly installed and functioning.

Step 4: Disassembly

Retract the slide and engage the slide stop in the open position. Insert a pencil, flat side first, into the barrel and push the Laser Cartridge gently out.

Tip: Remove battery when laser cartridge is not in use.

Using the SureStrike™ Laser Cartridge not according to the user guide will void the warranty.

No liability is expressed or implied for damage or injury as a result of installation or use of this product.

Warranty is limited to the replacement or repair of the original product only.
