

# SureStrike™

## Replacement Action Cap

The patented Action Cap is a digital control unit for the SureStrike™ laser cartridge. By using interchangeable action caps, you can decide which functionality is most suitable for your training. This feature makes the SureStrike™ the most versatile dry fire training system available today.

This package includes the following caliber action back cap:

- 9mm
- 380
- .223 / 5.56
- 38SPC / 357

This action back cap includes the following functions :

- Dry Fire: Enhance dry fire practice with point of impact recognition.
- Digital Boresight: Converts the SureStrike™ into a digital boresight.
- Multi-Mode: Dual function cap for both dry fire and digital boresight functions in one cap.
- Other

**We make shooters better! Spend less effort, time, and money by practicing with today's best personal training system anytime, anywhere!**

## Replacement Action Cap

SAFETY

IMPROVES ACCURACY

FIRING PIN ACTIVATED

NO VIBRATION SENSITIVITY

## Instructions

Unload the weapon. Physically and visually inspect the chamber, bore, and magazine well to ensure that all ammunition has been removed.

**⚠ Always personally verify that all ammunition has been removed before training.**

### Installation of Action Back Cap:

Unscrew the back cap from the laser module.

Insert the battery pack, plus side up. **(DO NOT REMOVE THE WRAPING!)**

Thread your new action back cap back on the laser module.

Verify the threading is fully closed and that there is no gap.

Push the black primer on the back of the cap to verify the laser works properly.

223

38SPC

9 mm

### Moving between modes with Multi-Mode Cap:

Multi-Mode cap (or Dual Function cap) includes two modes:

Mode 1: Dry Fire (split second light that will show point of impact)

Mode 2: Digital boresight (constant on light for sight alignment).

To change between dry fire (Mode 1) and boresight (Mode 2) first install the cap with the battery on the laser module as describe above.

Push the black primer on the back of the cap for 7 seconds. The laser will flash once (representing mode 1) and then flash twice (representing mode 2). Stop pushing the cap after you see two flashes. Your Laser is ready to be used as a digital boresight.

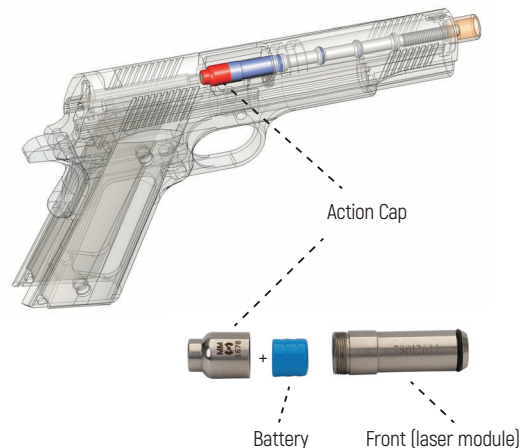

Place the laser cartridge inside your chamber and pull the trigger. The Firing pin will activate the laser.

Upon the 2nd shot the laser will turn off.

To return to dry fire mode, push the black primer again for 7 sec, the laser will flash once and then stop pushing.

You are now in dry fire mode.

**TIP:** The initial factory setting of the Multi-Mode cap is dry fire (mode 1)

Action Cap

Using the SureStrike™ Laser Cartridge not according to the user guide will void the warranty.

No liability is expressed or implied for damage or injury as a result of installation or use of this product. Warranty is limited to the replacement or repair of the original product only.
