

WEARABLE SENSOR SYSTEM

SCAN ME

Shot Body System

Allows professionals to problem-solve and fight as individuals or teams against live adversaries in realistic and dynamic encounters. Practice advanced gun handling skills, communication and tactical movement under stress and increase your teams' chance of survival in a deadly encounter.

ADVANTAGES:

- Live force-on-force training with no need for eye or hearing protection
- Train in the same environment and conditions that you would fight in
- Easy to Use - sensors clip onto users outer clothing - load bearing vests, hat & gear
- Infinite number of scenarios, more customizable with optional Firefly programming terminal
- Adaptable for recoil and non-recoiling platforms
- Visual shooter color identification with up to 6 IDs, plus 3 different hit settings
